

Above and Beyond

MARCH: Math

Recipe in the kitchen:

With an adult, you will cook or bake something in the kitchen, choosing a recipe in which the dish is made totally from scratch. (No box mixes).

Following recipes is a great way to learn fractions and introduce concepts such as how many ounces in a cup, how many tablespoons in a $\frac{1}{4}$ cup, etc. While you are cooking, discuss how much of each ingredient you would need if you doubled the recipe.

You will then bring the finished dish to school to share with the class. Have a copy of the recipe written down (or typed) and I will make copies for the class.

*Please bring in your dish and recipe anytime during the month of March.
